
Done, but with errors on page.

Posted by scrz - 2008/01/07 23:40

On the toolbar along the bottom of the page I get the message Done, but with errors on page. This is not on all pages, but is on the Home and Forums among other. I do not know if the whole page is being displayed or not.

This is something we are working on. It is not a major problem and the pages you see are being displayed fully.

We think we have boxed off all of the errors. If anyone still gets any errors please let us know.
